

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

of crops and as carriers of cattle disease is emphasized, as well as the importance of conserving the Buteonine hawks as a natural check upon them when their chief enemy the Coyote disappears. The plea that has recently been advanced in Pennsylvania in defense of removing protection from these birds — i. e. that the farmer cannot distinguish one hawk from another and therefore does not know when he can kill a hawk, if some are protected and others not, is disposed of in the following words: "With so much at stake a farmer or sportsman is no more justified in advancing ignorance as an excuse than he is in proclaiming his inability to distinguish between crops and weeds... discrimination is a part of his business and as such should be studied." Eight colored figures of hawks from clever paintings mainly by F. C. Hennessey illustrate the paper.— W. S.

'Aves' in the Zoological Record.¹— Mr. W. L. Slater has again ably catalogued the ornithological literature of the world, for the year 1916. Titles to the number of 942 are listed and systematically catalogued, an increase of eight over 1915. We notice that the German ornithological journals were accessible in England for at least a part of 1916, while none have reached 'The Auk' or any of the American libraries, so far as we are aware, since the issues for July or August, 1915! Evidently the British ornithologists are not inclined to adopt Lord Walsingham's suggestion (cf. *Nature*, Sept. 5, 1918) that for the next twenty years at least scientific men shall by common consent ignore all papers published in the German language. Dr. W. J. Holland's reply to Lord Walsingham's proposition (*Science*, Nov. 8, 1918) should be read by all interested in this matter, and we think all fair-minded persons will agree with him that there are plenty of ways to secure justice against the Germans without disrupting the whole underlying framework of scientific nomenclature, which we have been at such pains to build up. Such arbitrary action is, as he says, only an attempt "to beat the Prussians by Prussianizing ourselves." We are therefore very glad to find the last installment of 'Aves' as complete as its predecessors with the contributions from the central powers included, no matter how strictly we may hold them accountable for the crimes of the war. The value of Mr. Slater's compilation to the working ornithologist we have emphasized on a former occasion and we can only endorse what was said then and again commend the Zoological Society for maintaining this record for us during the strenuous years that have just passed.— W. S.

Proceedings of the Linnæan Society of New York.²— Besides the usual numerous notes dealing mainly with the vicinity of New York City

¹ *Zoological Record*, Vol. LIII, 1916. *Aves*. By W. L. Slater, M. A., pp. 1-72. August, 1918. Printed for the Zoological Society of London, sold at their House in Regent's Park, London, N. W. Price six shillings.

² Abstract of the Proceedings of the Linnæan Society of New York for the year ending March 12, 1918, No. 30, 1917-1918. Issued September 18, 1918, pp. 1-38, one plate.
